Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A mounting assembly for mounting an accessory to a weapon frame having at least a first slot formed in a first side of said weapon frame and a second slot formed in a second side of said weapon frame, said mounting assembly comprising:

a body;

a first jaw adjacent a first side of said body and a second jaws adjacent a second side of said body on opposing sides of said body, said first jaw having an engagement portion dimensioned to engage said first slot and said second jaw having an engagement portion dimensioned to engage said second slot; and

a first spring biasing member, said first spring being adjacent said first side of said body with said first jaw disposed between said first slot and said first spring, said first spring being configured to provide a biasing force against said first jaw to force said engagement portion of said first jaw into said first slot, and a second spring biasing member, said second spring being adjacent said second side of said body with said second jaw disposed between said second slot and said second spring, said second spring being configured to provide a biasing force against said second jaw to force said engagement portion of said second jaw into said second slot.

2. (Cancelled).

3. (Currently Amended) The mounting assembly of claim 12, wherein each said spring is at least partially disposed in said body and has a finger configured to contact an associated portion of said body to prevent said spring from traveling out of said body.

4. (Currently Amended) The mounting assembly of claim 12, wherein each said spring has an angled protrusion configured to contact an associated portion of said body to lock said spring in said body.

5 - 11 (Canceled)
